

Analysemethoden voor afvalstoffen op stortplaatsen

1 DOEL EN TOEPASSINGSGEBIED

Deze procedure vervangt de procedure CMA/2/II/A.13 van **oktober 2007**.

In deze CMA methode wordt een overzicht gegeven van de te analyseren parameters in het kader van aanvaardbaarheidscriteria voor afvalstoffen op stortplaatsen met referentie naar de bijhorende CMA procedure of Internationale/Europese normering.

2 MONSTERVOORBEHANDELING

Vooraangaandelijk aan de bepaling van de verschillende parameters is het noodzakelijk dat de te analyseren monsters dienen gehomogeniseerd te worden en verfijnd te worden om also juiste en reproduceerbare resultaten te bekomen. **De monstervoorbehandelingsprocedures zijn beschreven in CMA deel 5 Monstervoorbehandeling.**

3 ANALYSEMETHODEN

In Tabel 1 is een overzicht gegeven van de parameters en de bijhorende referentiemeetmethoden voor de analyse van de eluat. De analyses worden steeds uitgevoerd op een representatief monster en na uitlogging volgens CMA/2/II/A.12 of CMA/2/II/A.9.5. De normmethoden voor de analyse van de eluat zijn opgenomen in de overkoepelende norm **EN 16192**.

Tabel 1: Analysemethoden eluat

Parameter	CMA methode	Europese normering en Internationale normering
pH	CMA/2/I/A.1	ISO 10523
