

Methoden voor de bepaling van elementen

Deze procedure vervangt de procedure CMA/2/I/B van juni 2011.

Voor de conservering en bewaring van watermonsters worden verwezen naar CMA/1/B.

MATRICES: GRONDWATER, ELUATEN, DESTRUCTIEVLOEISTOFFEN

ELEMENTEN

Voor grondwater en eluat dient geen ontsluiting te worden uitgevoerd. De analyses worden uitgevoerd op de gefiltreerde ($0.45 \mu\text{m}$) monsters. Enkel indien een neerslag wordt waargenomen, dient een ontsluiting te worden uitgevoerd conform CMA/2/I/A.6.1 of CMA/2/I/A.6.3.

Voor bodem, vaste en pasteuze afvalstoffen dient een destructie te worden uitgevoerd conform CMA/2/II/A.3.

Voor **materiaal** die als meststof/bodemverbeterend middel worden aangewend, dient de destructie te worden uitgevoerd conform **CMA/2/IV/6 met uitzondering van vloeibare monsters met een droge stofgehalte < 2%. Deze worden behandeld als een afvalwater en ontsloten conform WAC/III/B/002.**

Voor olie dient een destructie te worden uitgevoerd conform CMA/2/III/F.

De volgende analysetechnieken kunnen gebruikt worden voor de bepaling van de elementen in grondwater, eluat, destructievloeistoffen:

antimoon

- ISO 11885:2007 Water quality — Determination of selected elements by inductively coupled plasma optical emission spectrometry (ICP-OES) (CMA/2/I/B.1)
- ISO 17294-1: 2004 Water quality – Application of inductively coupled plasma mass spectrometry (ICP-MS) – Part 1: General guidelines
- ISO 17294-2: 2003 Water quality – Application of inductively coupled plasma mass spectrometry (ICP-MS) – Part 2: Determination of 62 elements (CMA/2/I/B.5)
- CMA/2/I/B.6 Bepaling van antimoon, arseen en seleen met hydride-atomaire absorptie spectrometrie
- NEN 6433:1993 Water – Bepaling van het gehalte aan antimoon met behulp van atomaire absorptiespectrometrie (hydridgegeneratietechniek). Ontsplitsing met salpeterzuur en zoutzuur
- EN ISO 15586:2003 Water quality – Determination of trace elements using atomic absorption spectrometry with graphite furnace (CMA/2/I/B.2)
- ISO 20280:2007 Soil quality -- Determination of arsenic, antimony and selenium in aqua regia soil extracts with electrothermal or hydride-generation atomic absorption spectrometry

arseen

- ISO 11885:2007 Water quality — Determination of selected elements by inductively coupled plasma optical emission spectrometry (ICP-OES) (CMA/2/I/B.1)
- ISO 11969: 1996 Water quality – Determination of arsenic – Atomic absorption spectrometric method (hydride technique)

KWIK

Voor de bepaling van kwik in grondwater en eluatien is het toepassen van een ontsluiting afhankelijk van de conserverings- en bepalingstechniek.

Bij de bepaling van kwik met CV-AAS en CV-AFS (CMA/2/I/B.3) en BrCl als conservering reagens dient voor grondwater en eluatien geen ontsluiting te worden uitgevoerd.

Bij de bepaling van kwik met CV-AAS en CV-AFS (CMA/2/I/B.3) en kaliumdichromaat als conservering reagens dient zowel grondwater als de eluatien ontsloten te worden.

Volgende ontsluitingsmethoden kunnen worden toegepast:

- CMA/2/I/A.6.1 Ontsleuteling voor de bepaling van geselecteerde elementen in water – aqua regia ontsleuteling
- ~~CMA/2/I/A.6.3 Ontsleuteling voor de bepaling van geselecteerde elementen in water – salpeterzuurontsleuteling~~
- Ontsleutelingsmethode met kalium permanganaat/ kalium perroxidisulfaat
 - Breng 100 ml monster geconserveerd met HNO_3 en $\text{K}_2\text{Cr}_2\text{O}_7$ (0.05%), in een ontsleutelingsrecipiënt
 - Voeg 15 ml kalium permanganaat oplossing (50 g KMnO_4 /liter), 1 ml HNO_3 en 1 ml H_2SO_4 toe.
 - Laat de oplossing 15 min. staan, en voeg 10 ml kalium perroxidisulfaat oplossing (40 g $\text{K}_2\text{S}_2\text{O}_8$ /liter) toe
 - Plaats het recipiënt in een verwarmingstoestel (bv. blok of waterbad) bij 95°C gedurende 2uur
 - Indien nodig, voeg bijkomend kalium permanganaat oplossing toe
 - Laten afkoelen, en aanlengen tot gewenst volume.
- Ontsleuteling met BrCl oplossing bij kamertemperatuur gedurende min. 24 u volgens ISO 12846 § 7.4 (kT)
- Ontsleuteling met BrCl-reagens bij verhoogde temperatuur, BrCl (hT)¹

Bij de bepaling van Hg met ICP-MS dient onafhankelijk van de conservering voor grondwater en eluatien geen ontsleuteling te worden uitgevoerd.

Voor bodem, vaste en pasteuze afvalstoffen dient een destructie te worden uitgevoerd conform CMA/2/II/A.3.

Voor **materialen** die als bodemverbeterende middel/meststof worden aangewend, dient de destructie te worden uitgevoerd conform **CMA/2/IV/6**.

De volgende analysetechnieken kunnen gebruikt worden voor de bepaling van kwik in grondwater, eluatien en destructievloeistoffen:
